

## Providence Homes renews its commitment to marking their building materials and appliances with SmartWater.

Fort Lauderdale, FL – September 21, 2015

Over the past year Providence Homes has deployed SmartWater forensically traceable liquid, and SmartWater theft deterrence signs and decals at all of their new home construction sites. Providence Homes sprays the invisible tracking system on just about everything that can be stolen. An A/C compressor stolen from a site can represent a \$2000.00 loss. If the SmartWater theft deterrence system prevents one compressor from being stolen, the system has paid for itself.

Providence Homes represents an industry leader that recognizes the power of SmartWater forensic liquids in mitigating construction site property loss,” said Colonel (R) Leland Liebe, Chief Operating Officer for SmartWater CSI. “SmartWater belongs on every building site to protect construction materials and deter theft

### About SmartWater CSI

Worldwide, SmartWater has a proven track record of reducing property crime over the past seventeen years and has played a vital role in over 1,200 convictions. SmartWater products are forensically encoded liquids which can be applied to any property, thereby leaving an invisible ‘serial number’ on the item. The non-hazardous liquid is extremely robust, virtually impossible to remove and guaranteed to last a minimum of five (5) years. The technology does not contain organic DNA-based materials, which are degradable under sunlight and can be affected by temperature, oxygenation and other environmental factors.
